

NOESIS

Intelligence. Insight. Impact.

PROGRAMME BROCHURE

Intelligence-Led Metals Theft Investigations & Enforcement

From cable to courtroom — the full operational cycle, taught as one method.

THE PROBLEM

South Africa loses roughly R45 billion a year to infrastructure theft. Eskom: R5–7 billion annually in cable theft plus R2 billion in replacement. Transnet and PRASA: 30,000 km of infrastructure lost; roughly 11,000 copper theft incidents a year. City Power: R380 million in repair costs in a single year. Every unit is reacting. Nobody is trained to get ahead of it.

PROGRAMME AT A GLANCE

Duration	5 days
Format	In-person cohort
Alignment	NQF-aligned
Accreditation	SASSETA in progress
Delivery	National, South Africa

WHAT'S COVERED

- Module 1 — Understanding metals theft as organised crime and the illicit value chain
- Module 2 — Intelligence collection: source handling, OSINT, informant management, FICA-accountable partners
- Module 3 — Analysis: 5×5×5 grading, link charts, network analysis, geospatial pattern mapping
- Module 4 — Planning and executing lawful tactical operations: mandate, warrants, operational orders
- Module 5 — Making it stick: chain of custody, POCA, racketeering, money laundering, asset forfeiture, docket construction

WHO SHOULD ATTEND

- SAPS detectives and unit commanders
- Metro and municipal law enforcement commanders
- SOE security and risk divisions (Eskom, Transnet, PRASA, City Power)
- Private critical-infrastructure investigators
